

## How will system administrators and super users get up-to-speed quickly on their Omnicell systems?

### The Subscription Training Program

You've invested in Omnicell® medication dispensing technology to improve processes within your institution. To achieve the benefits, you need to get staff up to speed quickly.

Omnicell's Subscription Training Program offers a comprehensive, sustainable approach to training that addresses these issues, so you can maximize your investment in the long run.

#### The Right Training at the Right Time

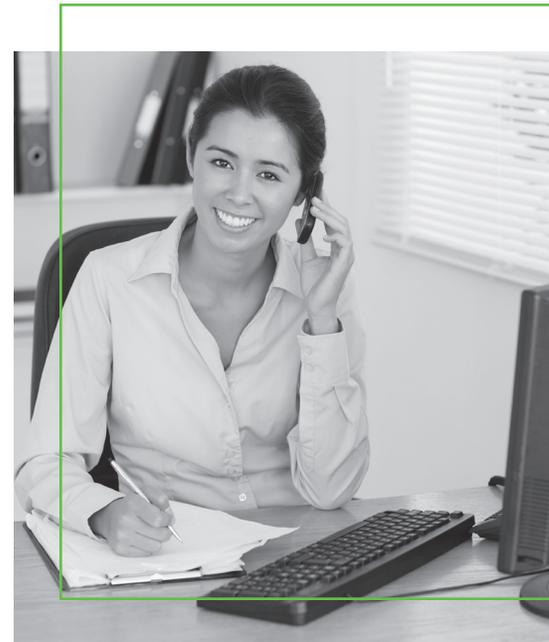

Easy access to a variety of training classes:

- **Flexible** - Courses include virtual instructor-led sessions and classroom workshops at Omnicell training centers.
- **Value** - Any system administrator or super user in the facility can attend as many training courses as desired for the length of the subscription.
- **Comprehensive** - Courses cover pre-installation basics through advanced topics and system optimization.
- **Live** - All virtual- and classroom-based courses are taught by experienced instructors

#### Virtual Instructor-led Training (VILT)

Live, interactive training in a web-based environment:

- **Focused Learning** - Sessions focused on specific topics
- **Cost Savings** - Avoid travel costs by participating from your own environment
- **Efficient** - Less time spent away from work
- **Engaging** - Interact with instructors and other participants, ask questions, and use a cloud-based lab

## Instructor-led Training (ILT)

In-depth courses delivered at an Omnicell Training Center:

- **Comprehensive Learning** - Multi-day, in-depth courses focused on specific products
- **Efficient** - Avoid interruptions from work, phone calls, and other distractions
- **Engagement** - Participate in discussions and engage with peers in scenario-based activities

## Courses

The Subscription Training Program covers the following:

Product	ILT	VILT
Central Pharmacy Manager	✓	✓
Controlled Substance Manager		✓
Point of Use Medication Dispensing Cabinets and OmniCenter	✓	✓
Supply Chain Management OptiFlex Procedure Systems and Omnicell Supply Management	✓	

\*Please note that Biomedical Service Training is not covered under the Subscription Training Program.

## How it Works

After subscribing to the program, your facility will receive a subscription number which enables any system administrator or super user in the facility to register for training courses.

Participants may register for any VILT or ILT class. Please note there is a limit of two attendees per facility at any specific training event. Travel expenses associated with training classes will be the responsibility of the facility.

To learn more about how the Subscription Training Program can build the expertise of your staff, contact your Systems Sales Director.
